HARD SEASON FOR WOLVERINE ELEVEN

Suffered More Defeats in 1914 Than in Many Years Since "Hurry Up" Yost Took Charge in 1901.

GRADUATION THINS RANKS
Washington and Jefferson, Chicago and Dartmouth Hit Hard—Harvard and Yale Likely Will Number Players Next Year.

The Michigan eleven suffered more defeats in 1914 than it has suffered in any single season since "Hurry Up" Yost took charge back in 1901. At the same time, the 1914 Wolverines scored more points than have any Mike and Blue team since that of 1905.

This record seems to show that the Michigan defense this year was weak, and that its offensive strength was great. Which is just about the situation. Michigan's offensive strength, however, was made up very largely of a fellow named Maubetsch. The whirlwind half back scored about half of Michigan's points, and by his great plunges carried the ball to points where the other players could take it over. Maubetsch proved himself to be the greatest single scoring power that Michigan has had since Willie Heston quit football.

Michigan's 1915 outlook is extremely rosy. The Wolverines have three regulars through graduation—Raymond Ford, center; Hughitt, quarter back, and the great guard, Michigan started the 1914 season with a green team. The team did not show up very well, but the players got the needed experience. It enters 1914 as a veteran team, and Michigan ought to make just about as large a noise next season as it used to make back in the dear old days that are gone but not forgotten.

Here is what happened at Michigan in a football way during the fourteen-year regime of Yost.

Year.	Won.	Lost.	Tied.	Mich.	Opp.
1901	11	0	0	644	0
1902	11	0	0	563	0
1903	11	0	0	563	0
1904	11	0	0	563	0
1905	12	1	0	495	7
1906	4	1	0	72	30
1907	4	1	0	125	6
1908	5	2	1	116	34
1909	6	1	0	116	34
1910	6	1	0	29	3
1911	5	2	0	252	67
1912	5	2	0	175	21
1913	6	3	0	232	83
1914	6	3	0	4,000	385

Shutouts by Michigan, 73. Shutouts by opponents, 2. Largest score made by Michigan, 130. Largest score made by opponents, 29. Average score by Michigan, 52.52-119. Average score by opponents, 3.29-119.

The Washington and Jefferson team, which ranks as one of the greatest turned out in the East this year, will be hard hit by graduation. Of the men who played on this year's team which beat Yale and which lost to Harvard by only one point, the following will graduate in June: Crulshank (captain), center; Goodwin, quarterback; Spiegel, half back; Young, full back; Patterson, tackle; Younkins, right guard, and Bovill, left end. Some of Washington and Jefferson's best substitutes will be leaving next year, too, but Coach Bob Folwell has some fine substitutes available, and they may plug up the great holes that will be left through the absence of this year's brightest stars.

Illinois, the champion eleven of the West, loses several good men by graduation, but will appear in 1915 with the majority of the 1914 stars back in harness. Those who graduate are Chapman, line-man; Armstrong, line-man; Graves, end; Schobinger, full back; and Stebens, Rue, Wagner, Senef and Doby, substitutes.

Those who will be back for 1915 are Macomber, half back; Pogue, half back; Squier, end; Clark, quarterback; Stewart, Nelson, Petty, Watson, Pettibridge, Pruett, Markwardt and Wanzer.

Dartmouth's eleven, the greatest scoring machine in the country this year, will be hard hit by graduations, and the coach faces a huge task in building up another green machine. Those who will graduate are Ghee, quarter back; Whitney, half back; Cannon, half back; Curtis, half back; Murdoch, half back; Cumisky, substitute quarter back; Tucker, substitute half back; Winship, Harold, Berry and Elms, ends, and Milmore and Child on the line.

Those who will remain are: ends, Talfer and Emery; line-men, Merrill, Paulth, Cotton, Baxter, McAuliffe, Dealy and Brown; the quarterback, Gerrish, Thielscher and Duhamel.

Graduations won't hurt Cornell very much. Some of its 1914 stars will quit college next June, but enough will be left to form the frame work of another great team.

Barrett, quarter back, will be back, and he's half of a team in himself. Cool, the center, also will be back. So will many of Cornell's great line-men, Shuler, half back, and Phillips, half back, will be graduated in June. Cornell will miss those two men, and so will it miss O'Brien, its star. But Cornell has some mighty promising looking half backs candidates, and those may develop into stars.

One of the consummations devoutly to be wished by the football enthusiasts is a game between Harvard and Dartmouth in 1915. They used to football together, but those two colleges, but a couple of years ago the Dartmouth youths slammed the Harvard team around in a way that was not at all pleasing to Harvard. And athletic relations were busted.

A game that would draw a record crowd, no matter where it was played, would be one between Dartmouth and one of the big Western colleges. Probably Dartmouth will arrange to meet Notre Dame in New York next fall. That would be a game worth gazing upon if Notre Dame could come along with one of the old-fashioned Notre Dame teams.

A Michigan-Dartmouth game in New York would be even a greater draw, but it is unlikely that such a game will be arranged.

Michigan next fall will journey to Philadelphia and also to Ithaca, N. Y. Michigan will play Harvard again, and the place probably will be in the new stadium. Harvard doesn't fancy traveling into sordid West y'no. If Michigan did accept a date with Harvard in Cambridge, that would make three long trips the team would have to take, and Michigan undoubtedly would refuse to make a fourth journey eastward to meet Dartmouth.

Harvard and Yale undoubtedly will grant the popular request next year and number their players. The athletic authorities at both places have become convinced that the scheme is sound, and the two long year cure stand out almost alone against the plan.

WILL OPEN BIDS

Addition to Be Erected to Glen Allen Public School Building.

School trustees of Brookland District, Henrico County, will meet at 5 o'clock to-morrow afternoon in the office of the county school board in the Chamber of Commerce Building for the purpose of opening bids for the construction of an addition to the school building at Glen Allen. Plans for the proposed building have been prepared and have been in the hands of the contractor for several weeks. Two large classrooms and an assembly hall will be constructed at a cost of approximately \$9,000.

The rapid growth of the Glen Allen community necessitates the proposed extension. A marked increase in attendance at the Glen Allen school has been shown from year to year, and during the approaching term it is expected that the attendance will exceed 200.

Target Tips and Hunting Helps

A New Question and Answer Department of Interest to Shooters.

JR. LANE MAKES HIS BOW.

Interest in shooting in all of its branches has greatly increased of late. More trap shooting, rifle and revolver clubs are being organized, and the public in general is making insistent demands upon authoritative sources for information covering the whole field of the sport.

Because of the number of questions which the Sporting Editor of The Richmond Times-Dispatch has received, he has arranged with me to take care of a department on the subject.

This column is open to queries on any subject concerning the use of firearms for hunting or target work. If space permits, I will also throw the column open to discussions, by readers, of various types of firearms and other things pertaining to the sport.

On questions regarding the abundance or scarcity of game in any particular locality, there will be some delay, as in most cases it will be necessary for me to write to some correspondent living in the section asked about.

Please make your questions as specific and definite as you possibly can. Such questions as "What is the best revolver?" or "What rifle shall I use for big game hunting?" obviously cannot be answered. Give me all the details, such as the conditions under which the arm is to be used and just what you expect to be able to do with it. If your questions are of such a nature that a lengthy answer is necessary, send me a stamped, self-addressed envelope and I will write to you personally. All questions should, of course, be sent to me in care of this paper.

Unkind communications will receive no attention, but the writer's name will be withheld if he desires.

From my experience with this line of work, I am led to anticipate that many questions will be asked which will be, in substance, identical, and therefore an answer to one such will answer all the rest.

The Dumdum Bullet.

There is one question which I know will be among the first, and that is "What is a dumdum bullet?" so I'm going to answer that one right now.

A dumdum bullet is, broadly speaking, any bullet designed to expand upon striking soft material such as flesh. The regular hunting cartridge used for big game is a dumdum because it has a soft lead nose sticking out of the front end of the bullet's metal jacket. When such a bullet strikes flesh, it "mushrooms," i. e., the soft lead nose spreads out like the top of a mushroom and the result is a big hole which usually quickly kills the animal struck. Cartridges for use in war have sharp pointed bullets and are supposed to drill a neat little hole, which, if not perforating a vital part, will heal quickly. The only trouble is, pointed bullets frequently ricochet erratically and instead of going straight through, they tip and tumble end over end and tear a hole as big as one made by a dumdum. This peculiar phenomenon occurs mostly at the shorter ranges and is perhaps the cause of the accusations regarding the use of dumdums by both sides in the present European trouble.

Now hustle along with your questions.

He'll Like

Our new Christmas Cravats. And there's a reason! You know we show more VARIETY than any mere "department." Recently we wrote for another fresh supply, and we secured real new silks, mostly advance Spring numbers.

THEY'RE HERE NOW. Just unpacked. Yum yum, but the patterns are pretty! Beautiful blendings. \$2.50 to \$3.00.

NO MATTER HOW MANY he has or gets, rest assured, he'll be pleased to receive some of these, packed in a pretty box.

Kirk-Barrish & Co.
Clothing-Furnishings

\$9.50 SPECIAL

This magnificent chair, oak frame, luxuriously upholstered in fine chamois leather (black or tan), special \$9.50. Why not combine beauty and utility in this splendid lasting gift.

WARNING ISSUED AGAINST DANGER OF HOG CHOLERA

Farm Demonstration Agent Urges Every Henrico Farmer to Have Hogs Vaccinated at Once.

Vaccination of hogs to prevent cholera and to check the ravages of that disease among the animals is being urged by J. C. Hunter, farm demonstration agent for Henrico County. Serum for vaccination purposes is supplied at a nominal cost by the State Department of Agriculture, and may be procured, with instructions for its use, at the Capitol Building.

It is pointed out that the cost of serum, 1 cent per cubic centimeter, is insignificant compared with the beneficial results to be obtained from its use. Farmers desiring information or assistance are invited to communicate with Mr. Hunter, who may be found at the County Courthouse, or may be reached by telephone—Madison 3336-V—at his residence at night.

"I would advise every farmer to have a veterinary surgeon come and vaccinate all his hogs immediately, or to vaccinate his own stock," said Mr. Hunter yesterday.

"Where hogs have died, it is imperative that the carcasses be destroyed by burning or burying deep at once. There is a law to this effect making the owner of the hogs liable to a heavy penalty for violation."

"If every carcass were disposed of at once the disease could be fought and checked, but as conditions are, the task is hopeless."

"Vaccination, therefore, is the only recourse and protection. Every owner of hogs should attend to this without day's delay."

"It is stated by the Department of Agriculture that there is at present more hog cholera in Virginia than ever was known before."

Wound Proves Fatal.

PHILADELPHIA, December 3.—Morris G. Condon, president of a manufacturing concern, who was shot in a hotel room here last week by a man who tried to rob him, died to-night. He was about fifty years old. The identity of Condon's assailant, who committed suicide, has not been established.

AMUSEMENTS

Colonial-Grace Scott Company in "The Christian."

Empire—Lucille La Verne Company in "Kiss Me Quick."

Lyric—Popular vaudeville, matinee and night.

Bijou—"The Dancing Princesses," burlesque.

Good Will at Lyric.

The new bill at the Lyric Theatre for the latter part of the week is well up to the standard set in recent programs, and once more demonstrates the fact that "big time" acts are being presented here, even though the Lyric is no longer regarded as being on the first vaudeville circuit.

The eccentric dancing of Jack Donahoe and the unusual comedy offered by Alice Stewart won for their offering, "Him and Her," the greater share of applause at the first performances yesterday. The program describes the act as being a bundle of talent and refined nonsense, and this description is entirely adequate.

Charles Hanlon and George Clifton appeared here when the Lyric was

really a "big time" vaudeville theatre. Their offering yesterday was identical with that presented at the former appearance, and once more scored a success. It is called "The Unexpected," and is a gymnastic exhibition of high quality.

Hale, Norcross and Company presented "Love in the Suburbs." The comedy playlet is funny in parts, and appeared to amuse the audiences. Granto and Maud, in a sensational bounding rope performance, also pleased. Fox and Ward, said to be one of the oldest minstrel and variety teams on the stage, offered a black-face act of song and chatter remarkably free from objectionable features and one which was amusing. They sang several old-time ditty songs in an entertaining manner.

The new release of the Hearst-Selig News Pictorial showed pictures of the Canadian troops and of their activities in the European war. Several scenes of important news events from other sections of the world were included on the film. An amusing comedy film

At the Academy of Music next Monday, Tuesday and Wednesday, with

Arctic and Tropical Pictures.

At the Academy of Music next Monday, Tuesday and Wednesday, with

daily matinees, will be exhibited an unusual motion picture combination. One set of films shown will depict the incidents of the Arctic hunt undertaken by Klein Schmidt for the Carnegie Museum, and the other will present a pictorial review of the Roosevelt South American expedition.

These pictures should be extremely interesting, as well as educational.

Why Suffer With Backache?

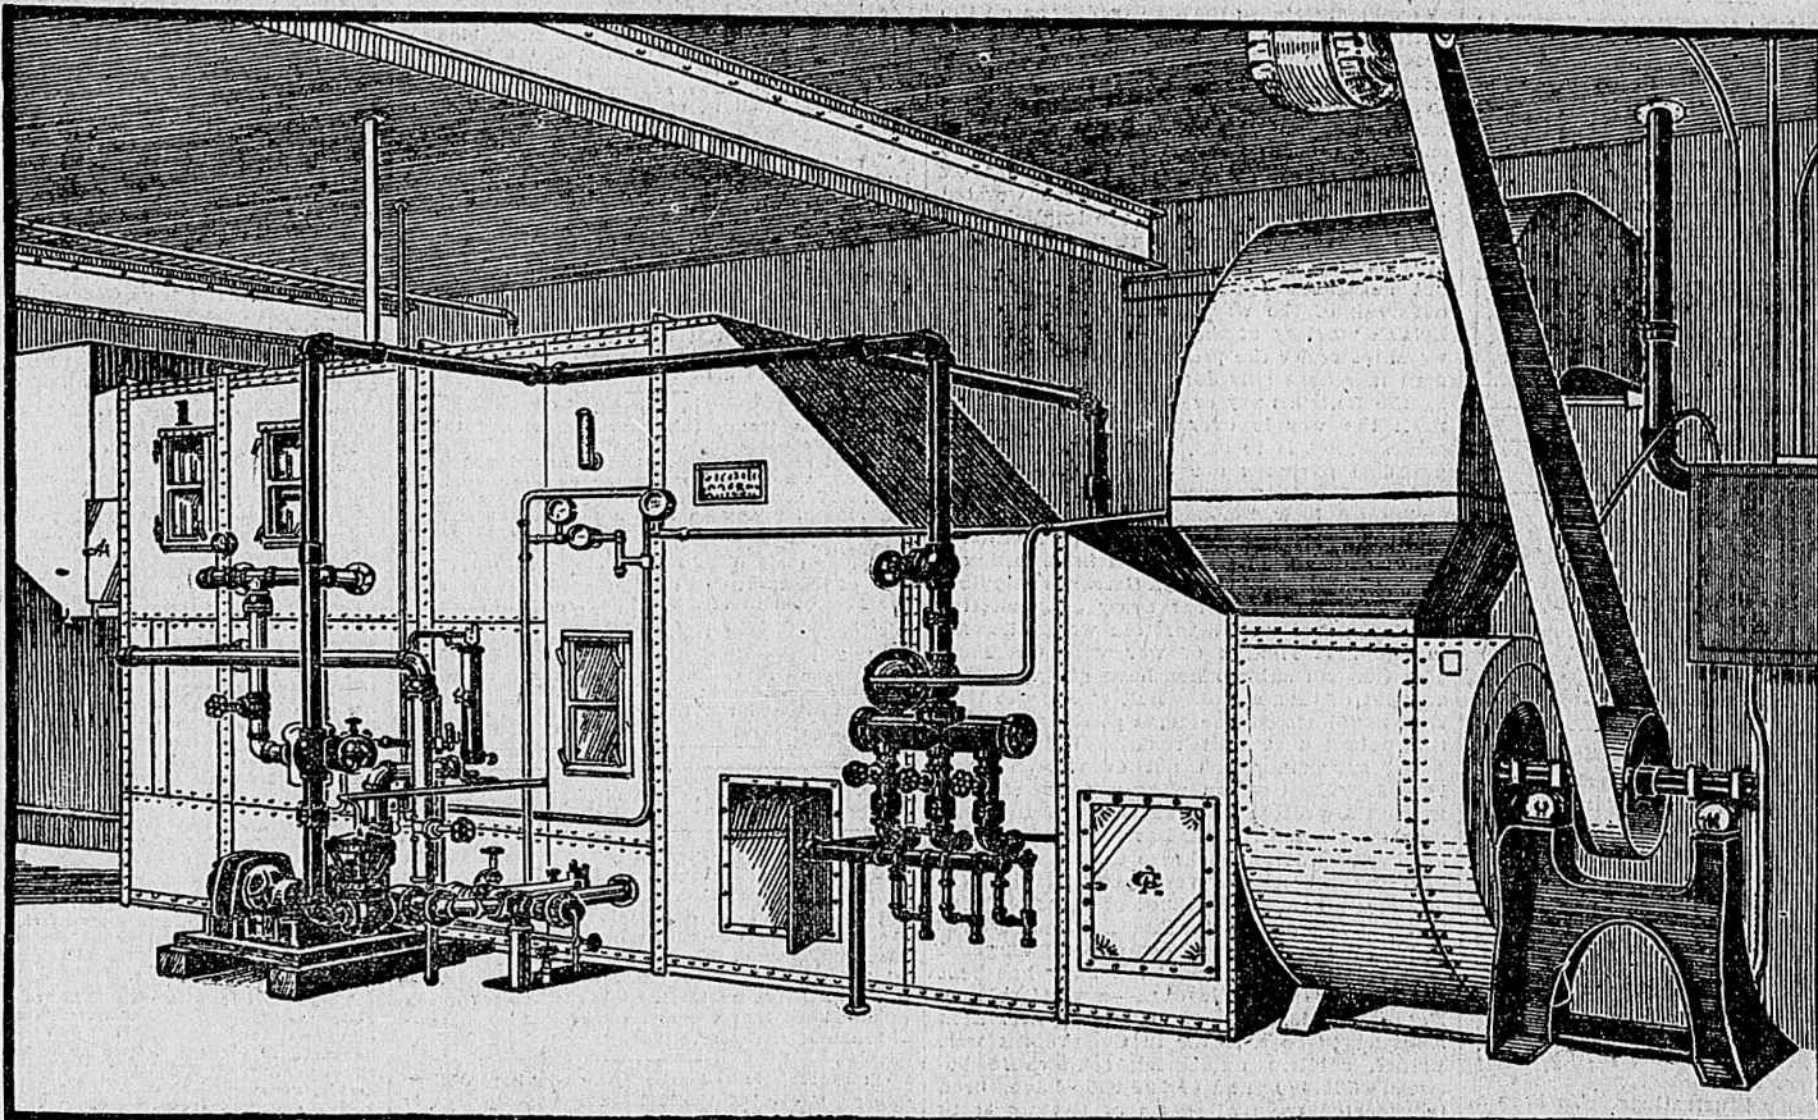

Indigestion, Liver, Kidney, Bladder or Stomach trouble? You can get a GUARANTEED remedy of your druggist. It has benefited 5,000 people in Richmond. It probably would help you. Remember the name, **TRIPP'S STOMACH BITTERS.**

We Actually Manufacture Our Own Weather at Our Bakery!

The weather has always been a hard master to the baker. On clear days when the air is fresh the dough raises fine. But on a damp, heavy day the dough refuses to act just right and the bread is not up to quality. With the aid of the wonderful apparatus shown above, we have absolute control over weather conditions in all parts of our wonderful bakery.

No matter whether the sun is shining or the rain is pouring down, no matter whether the sultry breezes of summer or the icy blasts of winter constitute the weather out of doors, inside the dough-room at THE PURITY BAKERY the air will always be just the right temperature—Pure, Sweet and Wholesome.

The Outdoor Air Is Washed

The air is taken in from the outside and every atom of dust, dirt or impurity is washed out of it by forcing it through a sheet of pure running water. This purified air is automatically tested. If too dry, moisture is added; if too damp, this air is dried; if too warm, it is cooled by refrigeration; if too cool, it is warmed by steam.

Day in and day out, the temperature and relative humidity of the air discharged from this "humidifier" varies less than two per cent.

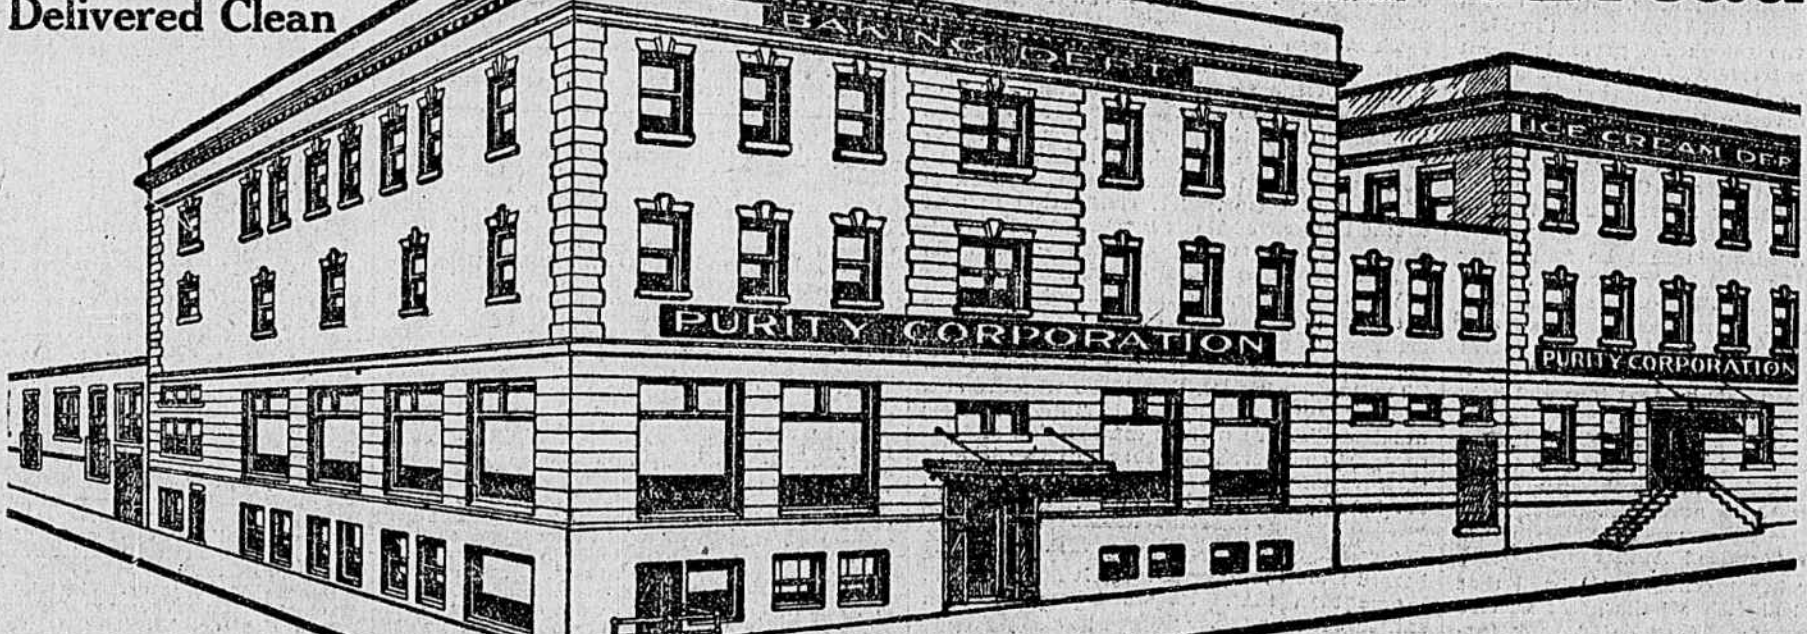

Not only does this wonderful device provide fresh, pure, clean air, but it also takes up the carbonic acid gas given off by the dough while it is in the process of fermenting.

A Wonderful Bakery Palace Where Cleanliness Is Practiced As a Religion

Our new bakery is a veritable baking palace. Every up-to-date idea in bakery construction has been installed. High, airy rooms, finished in white, with cement floors—big windows admit a wealth of sunshine—and marvelous automatic machines, resplendent in white enamel, perform each detail of the making of
